

Young Palettes Envision the Hudson, a children's art project, was created to educate and increase appreciation for the Hudson River in connection with the 2009 Quadricentennial, the celebration of the 400th year of exploration of the Hudson.

Young Palettes Envision the Hudson began in September 2008 with the request for art or classroom teachers in the public and private Newburgh area schools interested in involving their students in researching any aspect of the Hudson River tied to the Newburgh area.

Trestle, Inc. received 275 pieces of art from the 2nd through 9th grades! Through a judging process, 20 pieces were chosen to be made into art panels that are to be hung in the City of Newburgh.

In the near future, Trestle, Inc. will be creating and publishing a book to include all of the "Young Palettes" submissions. The book will be available for purchase, so everyone can obtain a piece of an historical archive from the Quadricentennial!

---

Thank you to the classroom teachers for their hard work and contributions to the Young Palette's Project.
